

# Postgres

The module requires

- NRPEModul
- LinuxBasicMonitoringModul

The module includes

## Service Templates

- POSTGRES\_AUTOVACUUM
- POSTGRES\_CHECKPOINTER
- POSTGRES\_STATS
- POSTGRES\_WAL
- POSTGRES\_WRITER

## Service Template Grps.

- Postgres Process Monitoring

## Todo client

On the client, the following lines must be added to the end of the `/etc/nagios/nrpe.cfg`.

```
command[postgres_checkpointer]=/usr/lib/nagios/plugins/check_procs -a 'postgres: checkpointer' -c 1:1
command[postgres_writer]=/usr/lib/nagios/plugins/check_procs -a 'postgres: writer' -c 1:1
command[postgres_autovacuum]=/usr/lib/nagios/plugins/check_procs -a 'postgres: autovacuum' -c 1:1
command[postgres_wal]=/usr/lib/nagios/plugins/check_procs -a 'postgres: wal' -c 1:1
command[postgres_stats]=/usr/lib/nagios/plugins/check_procs -a 'postgres: stats' -c 1:1
```

Then restart the nrpe daemon:

```
systemctl restart nagios-nrpe-server.service
```
