

# Host dependencies

Under "Expert Monitoring / Host Dependencies" you can access an overview of all host dependencies. In the header there are two buttons.

Provides the option to hide individual table columns.

Link to the input form for creating a new host dependency.

## New host dependency:

There is a button in the header of the input form used for creating a new host dependency.

Returns to the host dependency overview (without saving).

Field name	Required Field	Description
Container		The container in which the host dependency is to be created
Hosts		The hosts to be affected
Dependent hosts		The hosts that are to be dependent
Hostgroups		The host groups to be affected
Dependent Hostgroups		The host groups that are to be dependent
Timeperiod		The period in which the dependency should apply
Inherit parents		Parent objects to be affected as well
Execution failure criteria		The status for which the dependency takes effect
Notification failure criteria		Which statuses should trigger a notification
