

# Maps

## 1. Status Map

Under "Maps / Status Map" you can access a status map for all hosts. By clicking on a host you will zoom into the map and get detailed information about the host.

### Hoststatus

Host	
Host Name	default host
description	
State (State Type)	Host is up
Output	OK - 127.0.0.1: rta 0,040ms, lost 0%
Perfdata	
Current attempt	1/3
Last Check	2017-08-22 08:31:13
Next Check	2017-08-22 10:31:13
Last State Change	2017-08-22 08:31:13
Summary State	Unknown
Summary Output	Host is up. There are 4 Services

Service Name	State	Output
CHECK_LOCAL_DISK	Unreachable	
CHECK_LOCAL_LOAD	Ok	OK - load average: 0.08, 0.35, 0.21
CHECK_LOCAL_USERS	Ok	USERS OK - 2 users currently logged in
Ping	Ok	PING OK - Packet loss = 0%, RTA = 0.05 ms

Double clicking on the map will reset the zoom back to its original position.

A host search function has been integrated into the upper left corner of the map to facilitate searches by hostnames.

## 2. Auto Map

Under "Maps / Auto Map" you can access an overview of all auto maps. In the header there are two buttons.

 Link to the input form for creating a new auto map.

 Provides the option to filter the auto map list.

**New auto map:**

There is a button in the header of the input form used for creating a new auto map.

Returns to the auto map overview (without saving)
