

Creating host templates

URL: <https://123.123.123.123/hosttemplates/add.json>

Methode: POST

Response: HTML

JSON for creating a host template via REST API

```
{
  "Hosttemplate":{
    "container_id":1,
    "name":"api hosttemplate",
    "description":"api hosttemplate description",
    "Hostgroup":[],
    "notes":"api hosttemplate notes",
    "host_url":"http://api-hosttemplate.url",
    "priority":1,
    "tags":"api hosttemplate tags",
    "notify_period_id":1,
    "notification_interval":7200,
    "notify_on_recovery":1,
    "notify_on_down":1,
    "notify_on_unreachable":1,
    "notify_on_flapping":0,
    "notify_on_downtime":0,
    "active_checks_enabled":0,
    "Contact":[1],
    "Contactgroup":[],
    "command_id":4,
    "check_period_id":1,
    "max_check_attempts":3,
    "check_interval":600,
    "retry_interval":60,
    "flap_detection_enabled":0,
    "flap_detection_on_up":0,
    "flap_detection_on_down":0,
    "flap_detection_on_unreachable":0
  },
  "Hosttemplatecommandargumentvalue":{
    "3":{
      "value":"123",
      "commandargument_id":3
    },
    "4":{
      "value":"456",
      "commandargument_id":4
    }
  },
  "Customvariable":{
    "1":{
      "name":"NAME1",
      "value":"value1",
      "objecttype_id":512
    }
  }
}
```

Minimal JSON

```
{
  "Hosttemplate":{
    "container_id":1,
    "name":"api hosttemplate",
    "priority":1,
    "notify_period_id":1,
    "notification_interval":7200,
    "notify_on_recovery":1,
    "notify_on_down":1,
    "notify_on_unreachable":1,
    "notify_on_flapping":0,
    "notify_on_downtime":0,
    "active_checks_enabled":0,
    "Contact":[1],
    "Contactgroup":[],
    "command_id":4,
    "check_period_id":1,
    "max_check_attempts":3,
    "check_interval":600,
    "retry_interval":60
  }
}
```

Response on successful API call

```
{
  "id": "$HOSTTEMPLATE_ID"
}
```
