

Contacts

Under "Basic Monitoring / Contacts" you can access an overview of all contacts. Here you will find three or four buttons in the header.

Provides the option to hide individual table columns.

Link to input form for creating a new contact.

Allows you to import a contact from the configured LDAP server. Only displayed if LDAP authentication is enabled in the system settings.

Offers the ability to filter the contact list by name, email or pager.

New contact:

There is a button in the header of the input form used for creating a new contact.

Returns to the contact overview (without saving).
