"filter[Container.name]": null,  
"filter[Hostgroup.description]": null,
```

Finde Host Gruppen über den Namen

URL: [https://123.123.123.123/hostgroups/index.json?angular=true&filter\[Container.name\]=linux](https://123.123.123.123/hostgroups/index.json?angular=true&filter[Container.name]=linux)

Methode: GET

Response: JSON

Antwort

```
{
  "all_hostgroups": [
    {
      "Hostgroup": {
        "id": "1",
        "uuid": "706b275a-3885-4196-8174-aff3b37dc9ec",
        "container_id": "3",
        "description": "",
        "hostgroup_url": "",
        "allowEdit": true
      },
      "Container": {
        "id": "3",
        "containertype_id": "7",
        "name": "Linux",
        "parent_id": "1",
        "lft": "4",
        "rght": "5"
      }
    }
  ],
  "paging": {
    "page": 1,
    "current": 1,
    "count": 1,
    "prevPage": false,
    "nextPage": false,
    "pageCount": 1,
    "order": {
      "Container.name": "asc"
    },
    "limit": 25,
    "options": [
    ],
    "paramType": "named",
    "queryScope": null
  }
}
```

Finde Host Gruppen über die Beschreibung

URL: [https://123.123.123.123/hostgroups/index.json?angular=true&filter\[Hostgroup.description\]=all+linux+hosts](https://123.123.123.123/hostgroups/index.json?angular=true&filter[Hostgroup.description]=all+linux+hosts)

Methode: GET

Antwort: JSON

Die selbe Antwort wie oben bereits angezeigt.
