

Creating maps

URL: https://123.123.123.123/map_module/maps/add.json?angular=true

Methode: POST

Response: JSON

Variable	Required	Description	Type	Example
container_id	⚠	IDs of the containers in which the map is to be created	array	[1, 2, 3, ...]
name	⚠	Name of the map	string	"Api Map Name"
title	⚠	Map title	string	"Api Map Titel"
refresh_interval		Interval at which the map should reload in view mode (in seconds between 10 and 180)	integer	90

JSON for creating maps via REST API

```
{
  "Map": {
    "container_id": [ $CONTAINER_IDS ],
    "name": "Api Map Name",
    "title": "Api Map Title",
    "refresh_interval": 90
  }
}
```

Response on successful API call

```
{
  "id": "$MAP_ID"
}
```
